PROFILE SUMMARY

I am going to develop end-to-end solutions that meet business requirements and exceed customer expectations. I am a team player who excels in collaborative environments and enjoys working with cross-functional teams.

If you are looking for a .NET Developer who can deliver high-quality results, please don't hesitate to contact me.
EXPERIENCE

.NET Developer
Microservice-ATTO

Nov 2023 – Dec 2023   Tashkent , Uzbekistan

- '
- Together with the CashOverflow team, the CashOverflow website was built based on "The Standard" architecture.
- We used Test-Driven Development (TDD) to build a project called "CashOverFlow", which helps developers who want to work in the industry in Central Asia to access important information.
- I have gained experience in our team on Teamwork, proficient use of Version Control Systems (VCS), continuous integration/continuous deployment(CI/CD) processes and Unit Testing.
- Link:Cash Overflow
- Additionally, I have been working closely with the Tarteeb team to collaborate effectively and ensure that we are all on the same page when it comes to project goals and timelines.

A DAY OF MY LIFE

- Spending time with family
- New York & San Francisco Ballet Jawbone board member
- Public resolving issues with Yahoo! investors
- Sleeping & dreaming about work
- Baking cupcakes
- Showing Yahoo! employees that their work has meaning
- Business development for Yahoo! after the Verizon acquisition

MOST PROUD OF

🏆 **Our time**
<Our Youtube channel> We have gathered such a team that unites young programmers in the field of IT and shares knowledge. We share knowledge in the form of video lessons.

🏆 **Algorithm**
<My leetcode account> Learning new algorithmic solvings is my hobby. I am developing my agorithmic skills in LeetCode platform.
